

WCHL Scoresheet Notes:

1. Verify all information and fill out the scoresheets completely before sending them into your conference representative. Make any corrections on the original before sending it.
2. Fill in the date, time, conference, and type of game. If it is a cross-division game, check both division boxes.
3. Make sure the team names are filled out at the top scoreboard and above the appropriate roster of players.
4. The top line in each roster column is for your goalteander(s). If you use labels for your roster, please place one on each page of the scoresheet and mark the absent players on all labels. Goalies should be also be noted (preferably listed first).
5. Fill in the score appropriately in the scoreboard at the top. The goals scored in each period should match the total and correspond to the box score detail. Since we do not play overtime in regular season games, this box should be crossed out (x, /, -, etc).
6. In the box score detail, make sure each goal has the appropriate period number (Per) and verify the type of goal: PP is for Power Play, SH is for Short Handed, and EN is for Empty Net (not Even Strength). If you know a goal or assist was given to the wrong player, correct this, too. We try to keep stats, but sometimes not enough information is on the scoresheet or there are errors.
7. Include a contact name and number at the bottom of the sheet.
8. The winning team is responsible for sending in the scoresheet. If the game ends in a tie, the home team should send in the socresheet.

Scoresheets are to be sent into the conference representatives within 7 days of the game. Failure to do so may result in a double loss. There is also a \$10 fine if the scoresheets are consistently sent in late. Refer to Section 5.05 of the rulebook for more information.
